AIRZONE AIR GIAI

SPECIFICATIONS

PRODUCT NAME	Airzone Air Gaii
MODEL	GL-2108
WIND FLOW (M3/MIN)	Standard 2.2; Enhance: 2.6; Accelerate: 3.2
OZONE OUTPUT	500mg/h
ION OUTPUT	8*10 ⁶ pcs/cm ³
APPLICATION AREA	80m ²
TIMING	1H 2H 4H 8H
COLOR	Milk white
FILTER	<ul style="list-style-type: none">• Pre-filter (filter particles whose diameter is more than 20vm)• HEPA filter• Cold catalyst filter• Active charcoal filter• Four-layer filter, filtering less than 0.0001mm
OPERATING METHOD	Remote control and manual selection
VOLTAGE	AC220V/50Hz
POWER	50W
NET WEIGHT	3.34kg
DIMENSIONS	420x310x121mm

Ozone is a toxic gas and should not be inhaled. High levels of ozone in the air can be dangerous, especially for asthma or similar types of conditions which the visitor may have, therefore the ozone function would normally be deployed when the area in which it is situated is semi vacant or unoccupied and this will ensure sanitisation of the air and surfaces.
